Projects

A simple home page perfect for a pop-up restaurant or food truck. Originally a static website, I converted it into a responsive design using Flexbox.

Rogue Pickings

A multi-page responsive website coded with Flexbox. This versatile design has sections, including a cards design pattern, that can be repurposed for different sites.

Unplugged

Players guess the word by entering one letter at a time. If the player guesses all the letters correctly before they use up their allotted guess, they

win!

Guess the Word Game

Like What You See?

Let's meet for a cup of coffee.
